IN THE SPECIFICATION

Please amend the specification at page 29, line 20, through page 30, line 9, as follows:

The process proceeds along path 198 to element 200 for testing. To perform the testing, the URL for the newly created service is entered into the browser of the internet terminal, if known. ~~The typical URL is as follows:~~

~~http://machine-name/ICEGate/Category/Service~~

If the URL for the new service is not known, a list of the available services may be determined from the Cool ICE system by specifying the Cool ICE URL. ~~as follows:~~

~~http://machine-name/ICEGate~~

This call will result in a presentation of a menu containing the defined categories. Selecting a category from the list will result in a menu for the services defined within that category. The desired service can thus be selected for testing. Selection of the service by either means will result in presentation of the HTML page as shown at element 200.
